

Supplementary Table 1. Range of p value in comparison of serum 25-hydroxy vitamin D₃ levels between in-hospital survivors and non-survivors after bootstrapping

| | Original p value | p value after bootstrapping, median (IQR) |
|-------------------------------|--------------------|---|
| Total | 0.765 | 0.422 (0.204–0.711) |
| Sufficient vitamin D (n = 5) | 0.572 | 0.722 (0.446–0.872) |
| Deficient vitamin D (n = 103) | 0.071 | 0.055 (0.014–0.205) |

IQR, interquartile range.
